

MARINE (SOPEP) OIL SPILL RESPONSE KIT

Under Regulation 37 of MARPOL Annex I, oil tankers over 150 gross tonnage and all ships exceeding 400 gross tonnage must possess an approved Shipboard Oil Pollution Emergency Plan (SOPEP). To comply with this regulation, vessels under 400 feet require a 7-barrel (1100L) Marine Spill Kit, while those over 400 feet need a 12-barrel (1900L) Marine Spill Kit. Additionally, we've developed the (550L) Marine Spill Kit, providing versatility to disperse 1100L across various locations for comprehensive spill preparedness. These kits include a range of oil-only absorbents and personal protective equipment (PPE) to effectively address shipboard spills.
