

Polyethylene Dispensing Cans & Squeeze Bottles

Dispensing cans permit easy, one-hand dispensing of liquids directly onto work surface. Leakproof, self-closing, brass dispenser valve minimizes spills & controls excess. FM approved brass valves are ideal for use with flammables. Textured, high density polyethylene body provides a firm grip.

Squeeze bottles made of polyethylene with a stainless steel wire, provide safe dispensing of flammable liquids directly on small components or subassemblies with a minimum of over-spray. Squeezing the bottle produces a fine stream of liquid. Stem can be shaped to dispense into hard-to-get areas. Squeeze bottles are intended for daily use only.
